compiled with a four day delay. But this be responsible for...

# Carbon trading information comes to the Tablelands

Are you interested in getting a \$\$\$\$ return for protecting or enhancing the vegetation on your land?

Landcare Australia will present to Tableland landholders information about a new carbon trading scheme, CarbonSMART.

The free information session on March 9th is hosted locally by the School for Field Studies, and the BRICMA Green Corridor project.

CarbonSMART has been developed in response to growing demand from Australian landholders and the corporate sector to offset carbon emissions. Landholders will be able to secure a regular income for up to 30 years by establishing and maintaining native vegetation on their land. To ensure that landholders are paid fairly for their commitment, the CarbonSMART program

allows for increases in carbon prices to be passed on. A trading pool allows the spreading of risk from fire or weather.

Trading in carbon credits is already here and will grow even more rapidly once government policy embraces carbon trading.

The CarbonSMART program is a not-for-profit initiative owned by Landcare Australia and sponsored by the Australian Department of Agriculture, Fisheries and Forestry, the Westpac Banking Corporation and Freehills.

It will be held at the Bonadio family property, Atherton-Yungaburra Rd (Yungaburra side of Jim Chapman bridge: see the sign) from 9 am to 12 noon, Friday March 9.

Registration is necessary for catering purposes and places are limited to 50. Please register interest, by phone the School for Field Studies 4095 3656, by March 8.

**Tree Kangaroo Cafe**

**MALANDA FALLS**

Wishes to advise it's many clients, we will be closed during February 2007

Re-Opening Friday March 9th, 2007
